Business Growth & Projection

Our Working Process

Scope of Work / Timeline Requirement

Formal document that captures and defines the task, activities, deliverable, and timeline

Drawings and Approvals (BMC)

Considering client's needs we convert our ideas and innovations into drawing for approval

Detail Engineering

The selected concept and choices are refined and developed into a more detail comprehensive format

Material Selection

Selection of required material for client approved designs, with their consideration

Final Costing

After selecting the material and methodology, final costing of project in detail is provided

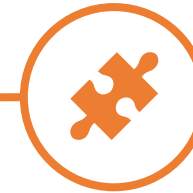

Site Handover for Work

It is the commencement of contract, the client handover the site to start the work

Commencement of Actual Work on Site

As per the innovations and ideas, project management team start the actual work on site according to drawing

Final Scope of Work

Our team will evaluate and review the project for final implementation

Site Visit by Client / Inspection

Our dedicated project co-ordination team ensure that schedules are strictly adhered, so that client visit is worth of time

Our Expertise

We provide a comprehensive and unique range of professional services that benefit the business performance of corporate clients across a range of business sectors.

ACLIX can supply and fit out all the following:

Concept design, storage audit, building survey, full interior design, and space planning through to 2D and 3D virtual reality imaging.

01

Architectural and Interior Designing

02

Project Management

03

Structural Engineering

04

Civil Engineering / Plumbing

05

Access Control System

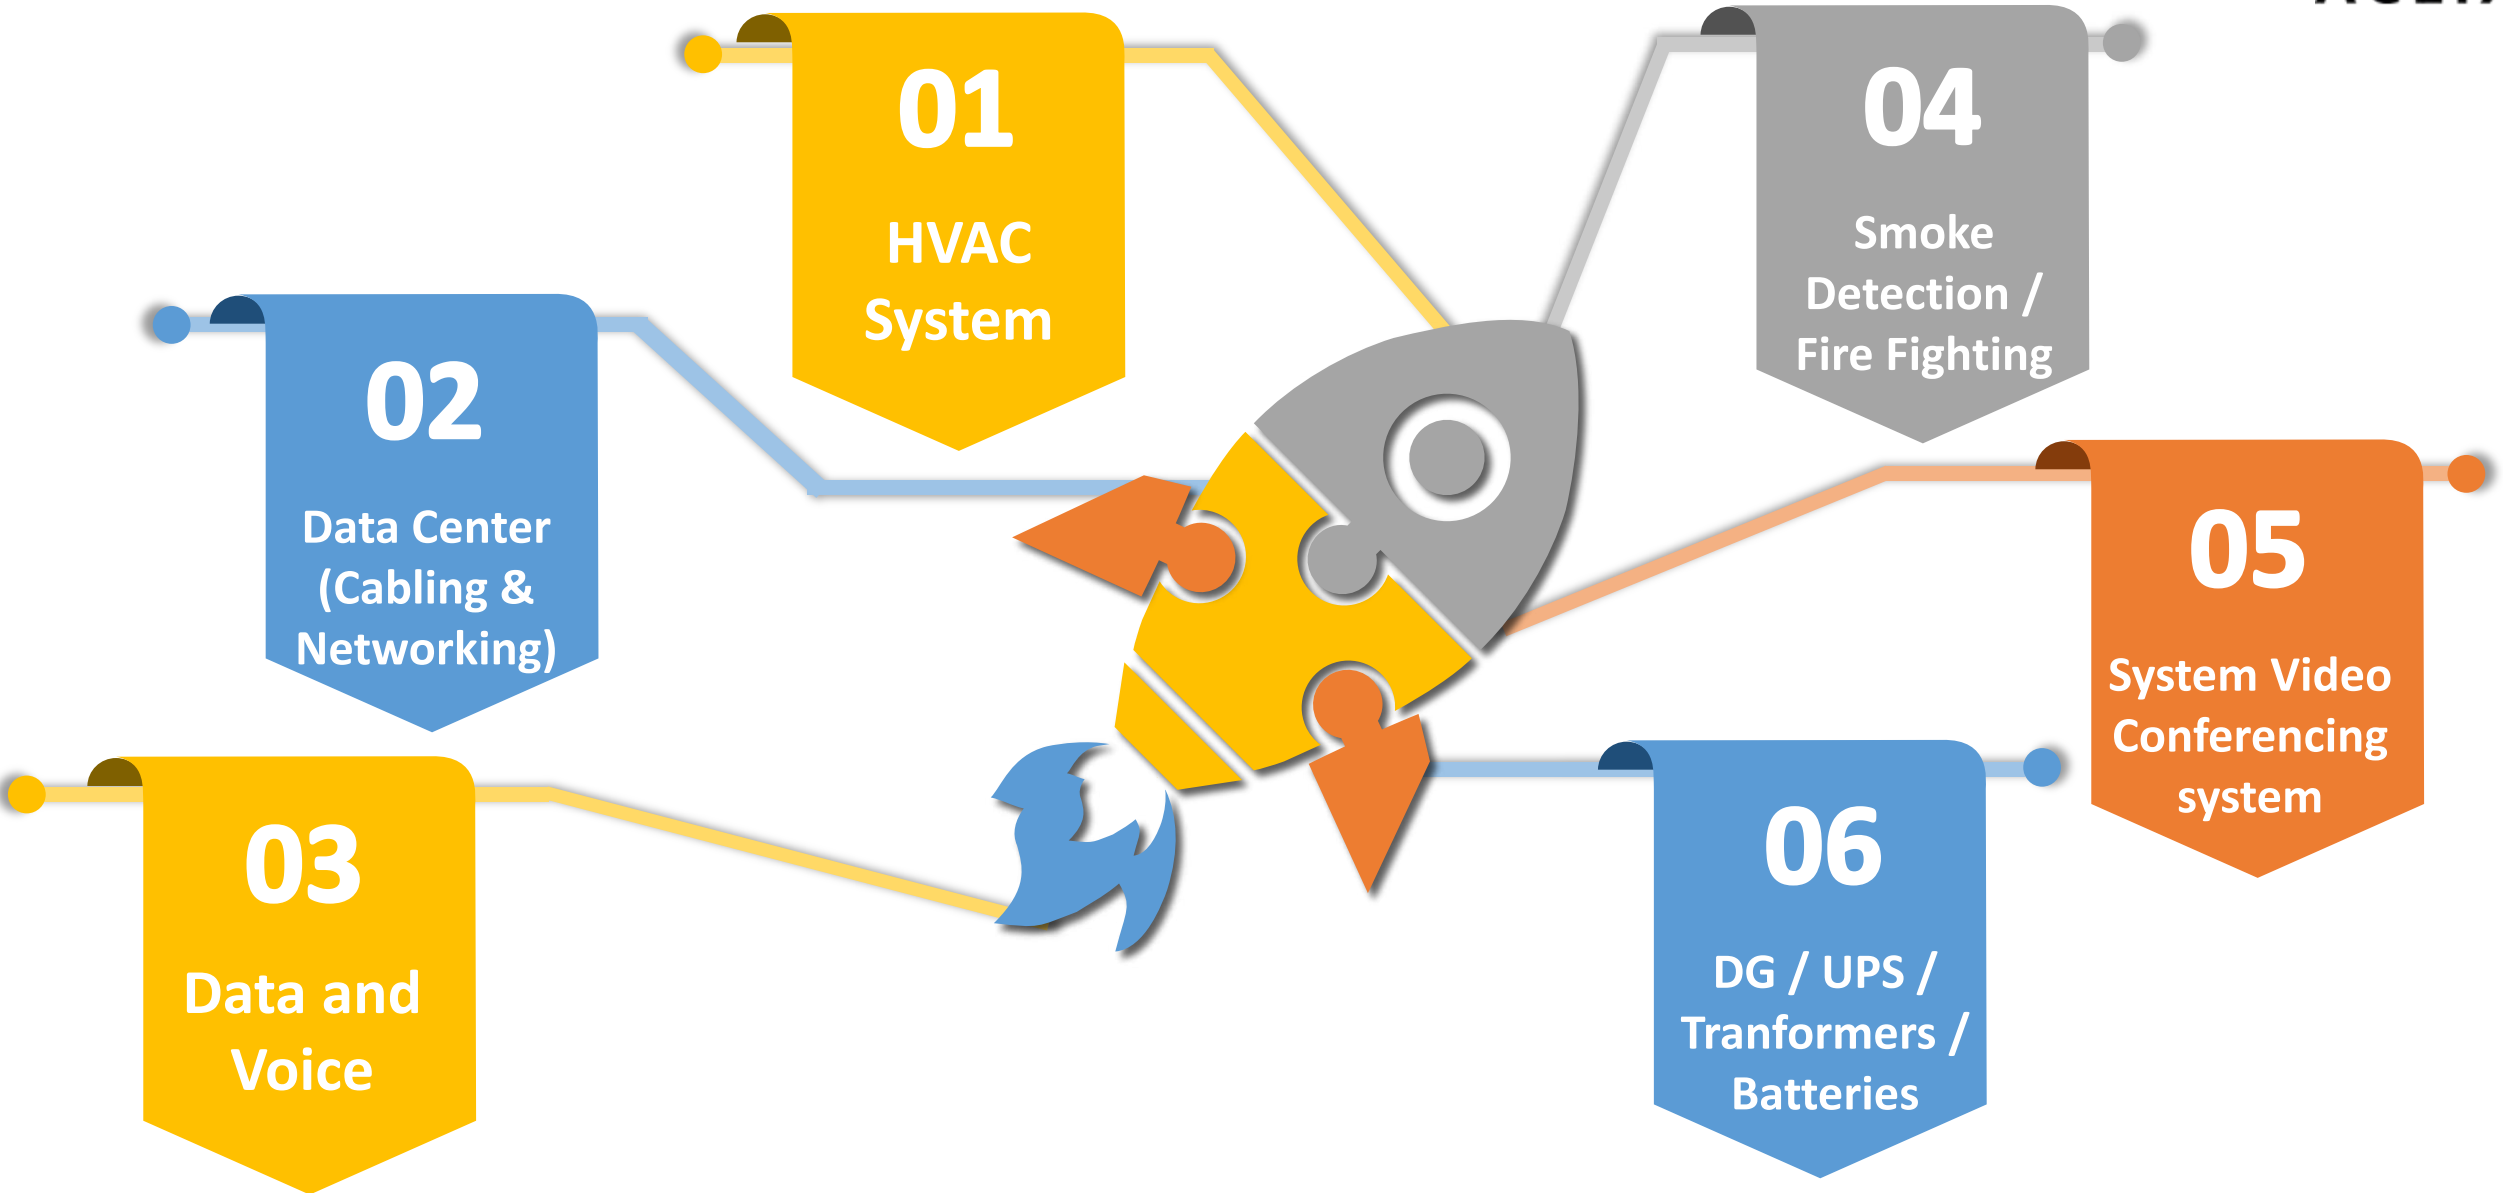

06

Fire Fighting System

**OUR
EXPERTISE**

OUR EXPERTISE

We Practice

ACLIX take full responsibility for project management and supervision of the office space planning, office design, office refurbishment works, furniture installation and office relocation.

ACLIX have in place proven systems and management procedures which includes:

Detailed project programs

Rigorous Health & safety process

Construction documentation

Cost planning

OUR CORE SERVICES

Data Center Management

Infra Structure Management

Vertical 1

Data Center Management

Data center management is a complex task that requires strong attention involving the management of hardware, software, and other infrastructures to provide a seamless customer experience.

ACLIX is a professional data center management company boarded with experts from data management and cloud computing. With ACLIX you can highly rely on data center hardware and software solutions.

We help data management companies to plan and take a decision for current and future needs.

DC Lift and Shift Migration:

ACLIX offers cost-saving lift and shift migration services that are required to modernize your applications and workflow.

- Transportation
- Rack and stack
- Installation/Removal
- Implementation

Structured cabling supply and installation:

ACLIX offers

- **Structured Cabling**
- **Inter RACK cabling**
- **Device-to-device cabling**
- **Copper & Fiber cross connects**
- **Cable dressing as per the data center's standard**
- **Basket tray installation**

Planning installation

Upon understanding the detailed requirement from the client, we plan the installation.

Estimating network

Estimating the length of the cable required, its costs, and other equipment charges.

Installing cable infrastructure

We create a blueprint of the network using tools and execute the same.

Inter RACK cabling supply and installation:

ACLIX supplies high-quality cables that are suitable for data centers.

Preparing the site

Mounting the array

Installation of the array

Configuring IP addresses

Installing CAM on a central management host

Active and passive components

ACLIX supplies premium quality active and passive components for networking in data centers offering customized components suitable for the application.

Passive components

01

Fiberglass cabling

02

Coaxial cabling

03

Microwave

04

Surge protection devices

05

Wires & cables

06

Structured cabling

07

Cable assembling

Active components

01 > Networking and security products

02 > Servers and storage devices

03 > Wireless connections

04 > PDUs (Power distribution)

05 > Batteries

06 > Transceivers

07 > Jammers

08 > Converters

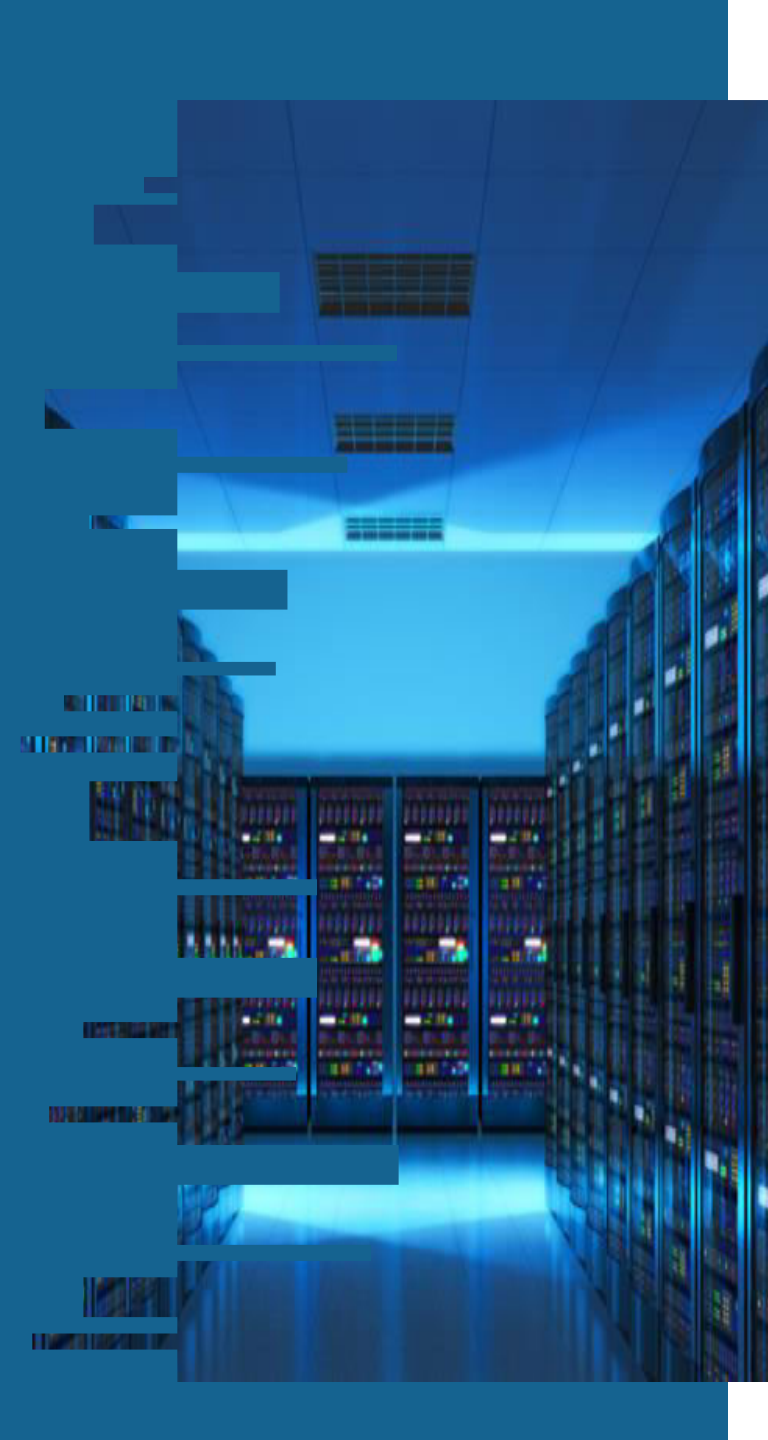

RACKS, RACK PDU, IBMS, HVAC, MEP Services:

ACLIX's data center maintenance solutions come with high-quality RACKS, RACK PDU, IBMS, and HVAC including MEP services.

RACKS

Reliable RACKS to organize hardware devices and network them.

Rack PDU

Efficient Rack Power Distribution Units to ensure delivery of critical power to IT loads.

IBMS

Computer-based highly responsive Integrated building management systems (IBMS) to control and monitor active and passive devices connected to it.

HVAC

Heating, ventilation, and air conditioning services to maintain the optimum temperature at the data centers.

MEP Services

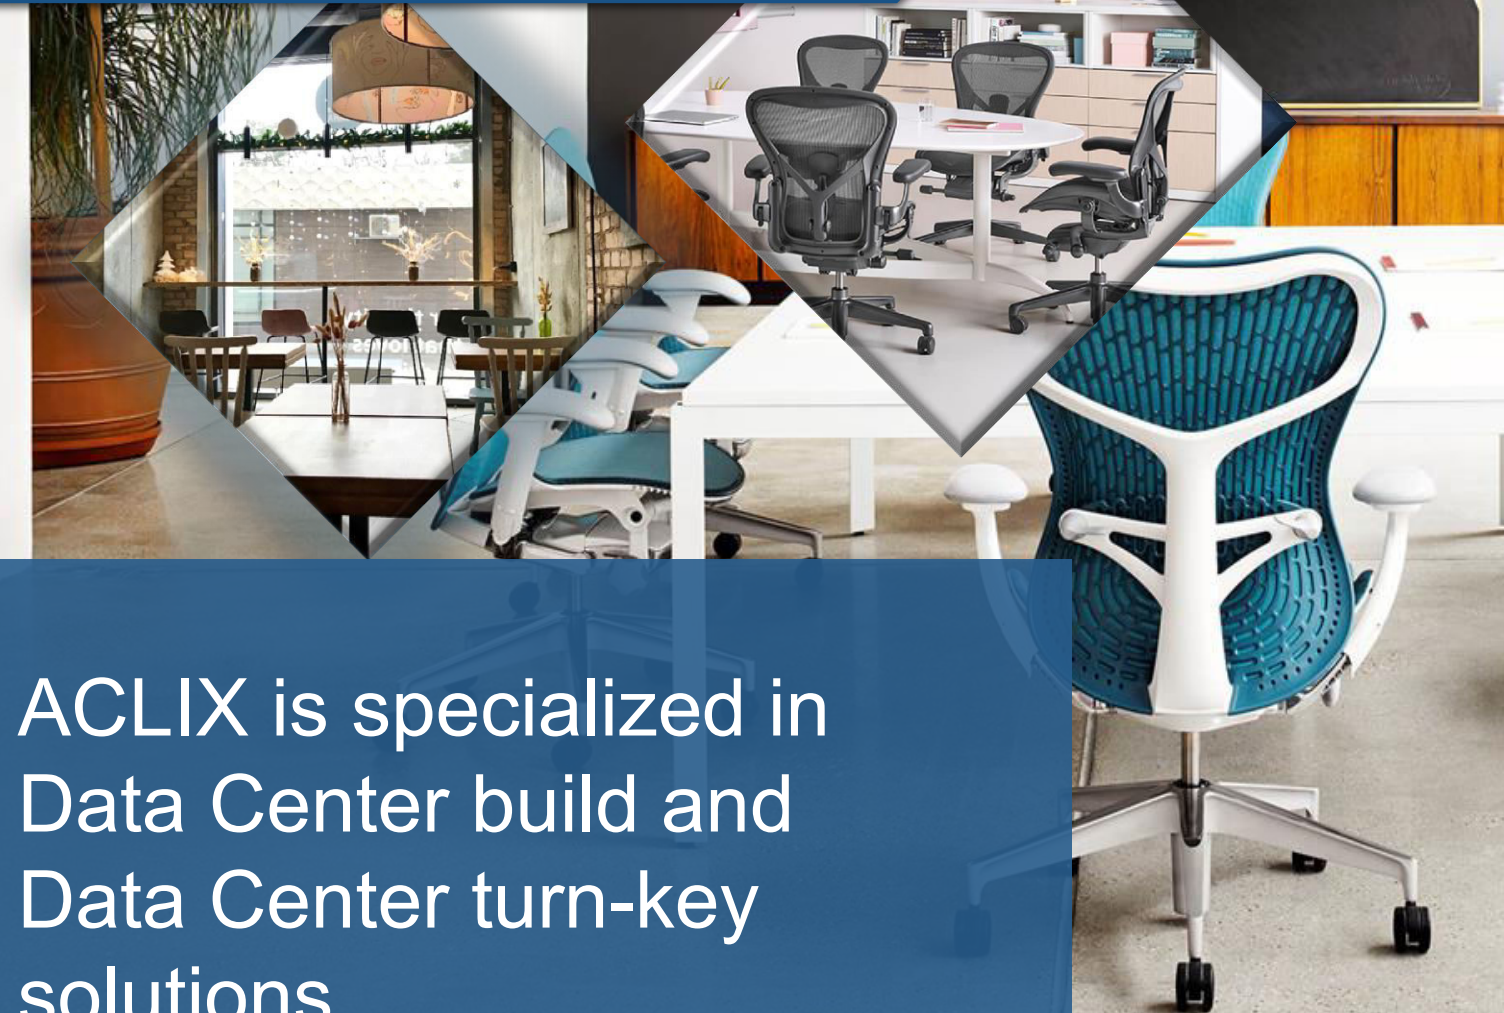

Complete mechanical, electrical, and plumbing services for data center maintenance.

Stainless Steel Cage and Mild Steel Cage:

Good quality customizable stainless steel cage and mild steel cage to ensure the safety and security of the server and its components. An extra layer of safety and security to the hardware parts.

DC-build and Turnkey projects:

ACLIX is specialized in
Data Center build and
Data Center turn-key
solutions.

- ✓ We plan for high-performance DC-build infrastructure with our IT engineers and network specialists that help to build customized, modular, organized, and energy-efficient data centers.
- ✓ Whether the data center is utilized for its own organization's use or for third-party uses, ACLIX is your right choice for a DC-build planner.

Turnkey DC solutions help reduce your data center operating cost by effectively monitoring and controlling critical data infrastructure. With proper implementation of technical equipment of data centers and servers, unnecessary expenses can be cut.

- ✓ Pre-project development
- ✓ Design and estimation
- ✓ Engineering and procurement
- ✓ Implementation of project design
- ✓ Customer signoff
