**Fire Fighting System**

**OUR  
EXPERTISE**

# OUR EXPERTISE

# We Practice

ACLIX take full responsibility for project management and supervision of the office space planning, office design, office refurbishment works, furniture installation and office relocation.

ACLIX have in place proven systems and management procedures which includes:

**Detailed project programs**

**Rigorous Health & safety process**

**Construction documentation**

**Cost planning**

# OUR CORE SERVICES

**Data Center Management**

**Infra Structure Management**

Infrastructure Management Services(IMS) in the IT industry involve administering the network and managing technologies and data in an efficient way. It has a wide scope with networking, data center maintenance, backup and storage, data transfer, OEM support, data security, and other cloud-based security.

# Infrastructure Management Services(IMS)

**Vertical 2**

ACLIX is a professional infrastructure management service provider boarded with IT experts. Our primary focus is on truly understanding our client's requirements and providing customized infrastructure management services with our cutting-edge technology to meet their IT business goals

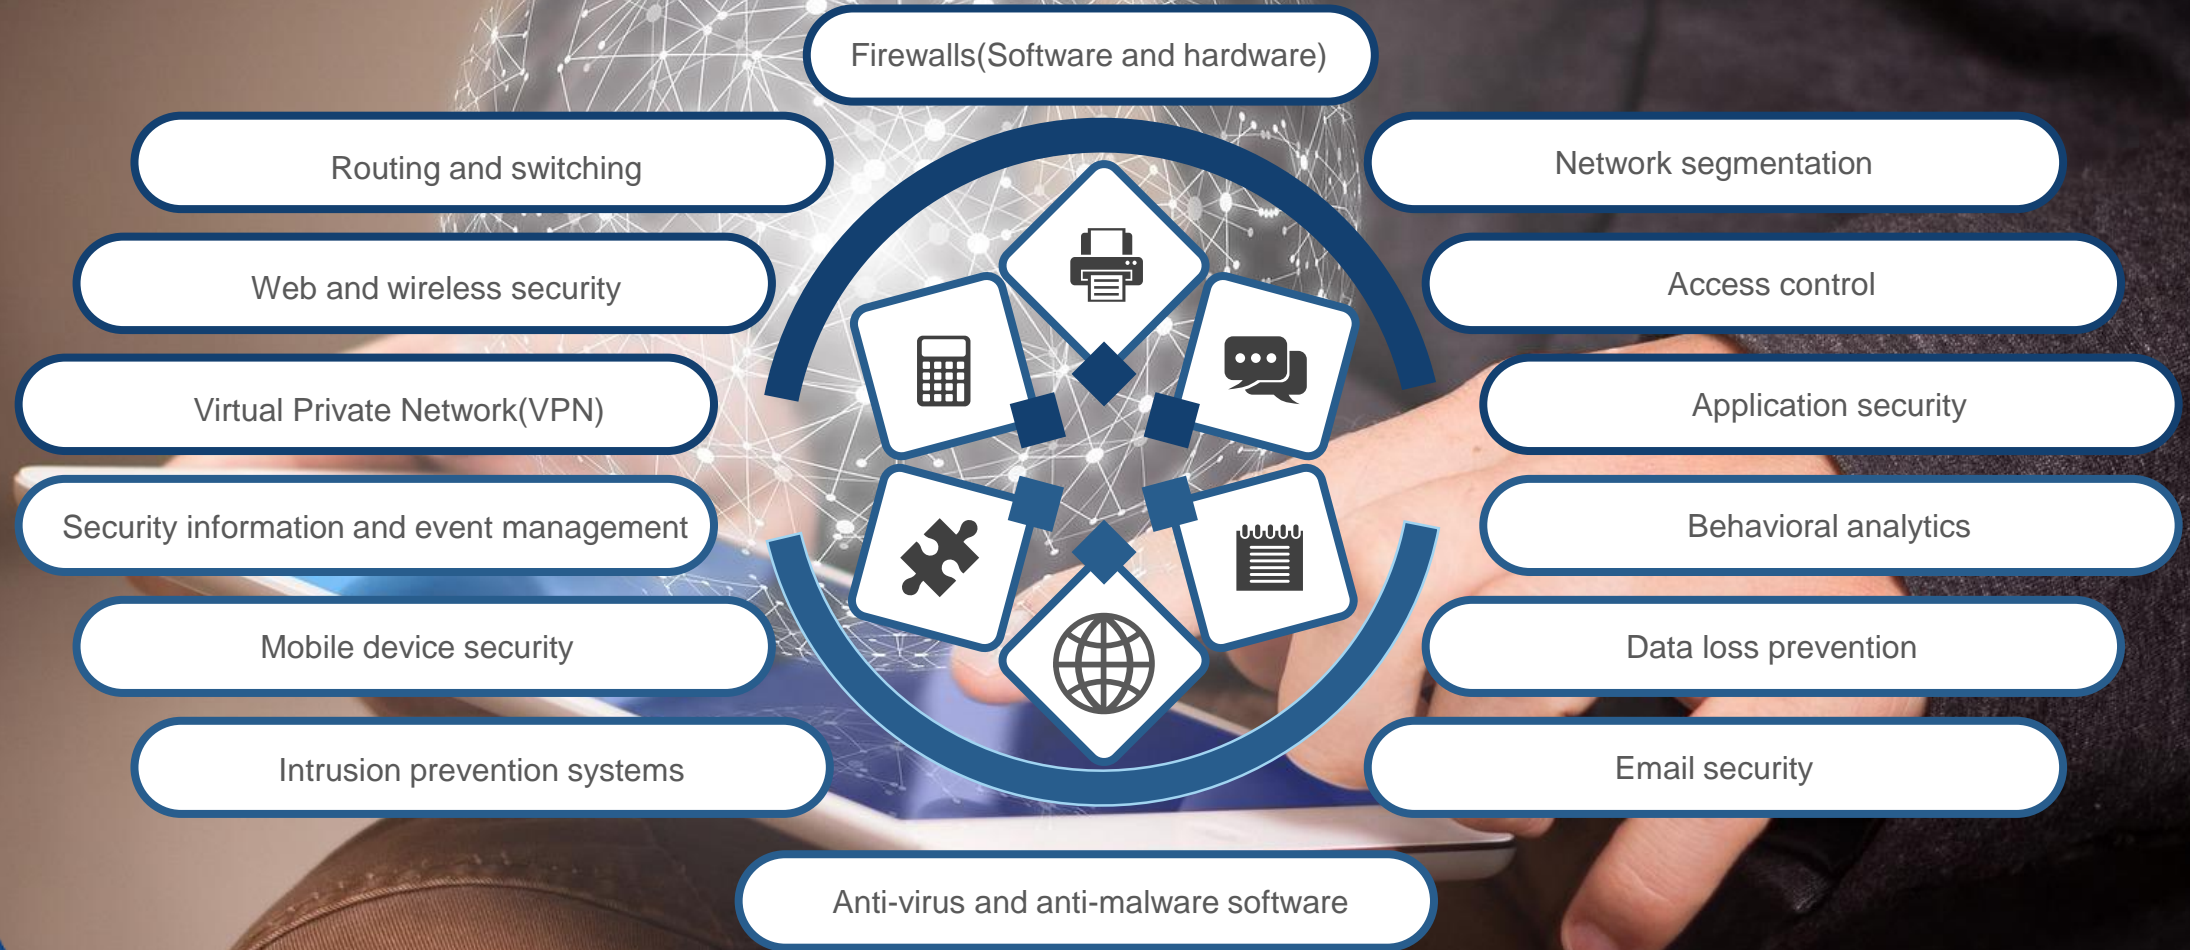

With our commitment to providing quality service through various technological solutions to our clients, ACLIX always believes in progressing together.

Our innovative ideas and years of experience in networking, security, data backup, data storage, cloud services, OEM support, etc make the services feasible.

## Infrastructure Management Services(IMS)

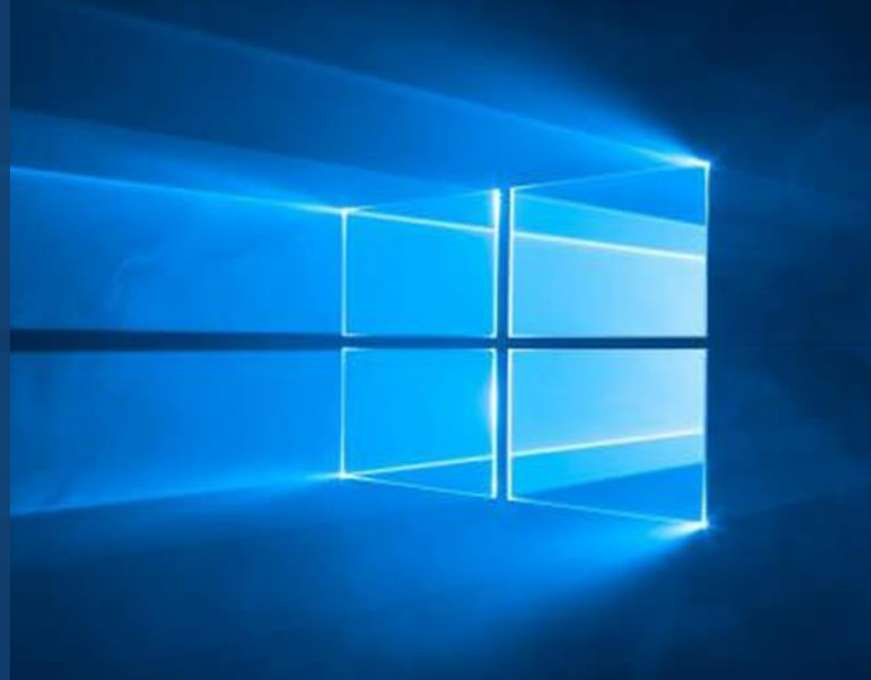

# Networking and Security

Our promising networking and security services will always uphold your business as per the latest data management industry trends.

“  
Windows,  
Oracle,  
and SQL  
”

These technologies are widely used in the IT industry, and most B2B and B2C applications rely upon them.

ORACLE®

Considering the industry demands ACLIX offers technology solutions using technology platforms like Windows, Oracle, and SQL. For the client's needs, all technology solutions are in a single package.

# Backup and Storage

**ACLIX is helping big data processing companies to back up and store their data without any hassle safely.**

- ✓ Network Attached Storage (NAS)
- ✓ External hard drives
- ✓ Cloud storage
- ✓ Veeam backup

# NOC, SOC, Ticketing Tools

Our technological tools help to deal with the issues correctly and suggest corrections in the right way.

A SOC assures improved preventative measures for any unauthorized data access and ensures the security of the data center.

**Network Operations Center (NOC)**

Our NOC plans to detect abnormalities and take preventive measures at the instant and quickly resolve them as they emerge. Solving the problem by analyzing data from Infrastructure monitoring and user experience monitoring.

**Security Operation Center (SOC)**

SOC to monitor the entire IT infrastructure round the clock and detect and neutralize cyber threats in real time. With SOC you build more trust with your third-party clients and you adhere to data privacy regulations.

# Help Desk and Ticketing Tools

To address customers' queries in an organized manner we help our clients handle the Help Desk through the ticketing system.

## Some of the Ticketing tools

- ✓ Kintana
- ✓ Service now
- ✓ BMC Remedy

# All Assessment

For any network issues, we have our in-house experts ready for a complex network, security, and vulnerability assessment.

- ✓ Penetration test
- ✓ Network scanning
- ✓ Internal weaknesses
- ✓ Network enumeration
- ✓ Third-party review
- ✓ Information security policy review
- ✓ Vulnerability assessment

# OEM Support

ACLIX is specialized in providing Original Equipment Manufacturer(OEM) Support to clients from various industry domains.

- ✓ Block chain
- ✓ Predictive analytics
- ✓ Augmented reality (AR)

# Unix and Solaris

ACLIX also offers services to IT solutions including Unix and Solaris operating systems.

Unix was developed by the creator of "The C" programming language Dennis Ritchie along with Ken Thompson at AT&T Bell laboratories in 1970. Unix follows a hierarchical structure of file storage and access that makes it flexible and suitable for multitasking.

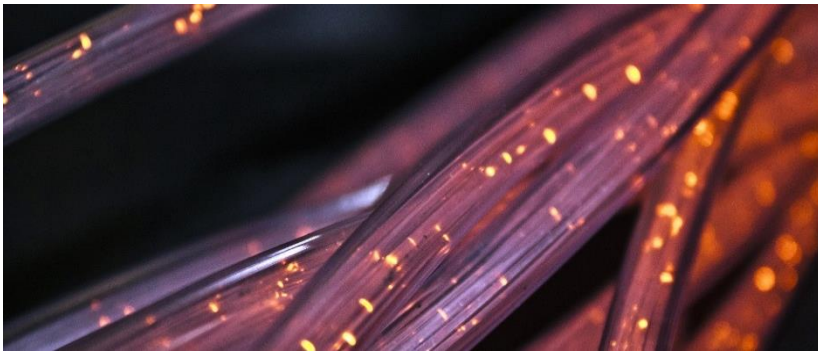

Solaris is ideal for Java applications and Oracle Database.

# Cloud Services

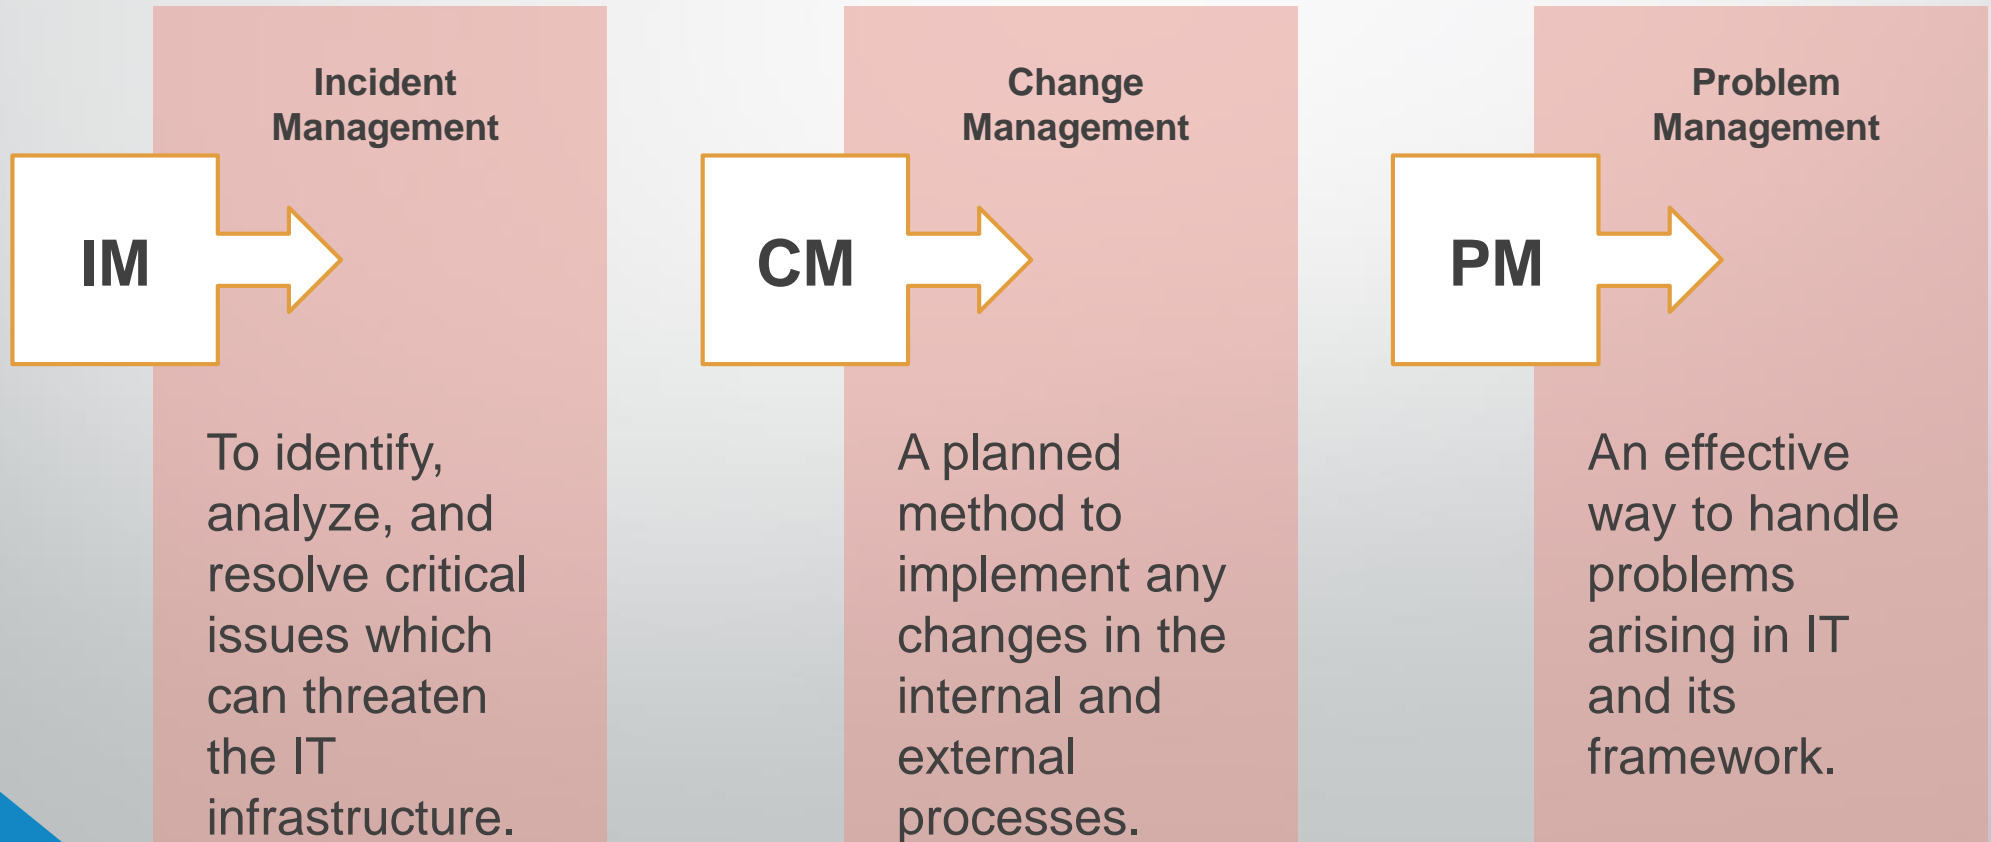

Cloud computing is one of the significant IT technologies, our unique cloud services facilitate the flow of user data fast and securely.

- ❖ Software as a Service (SaaS)
- ❖ Infrastructure as a Service (IaaS)
- ❖ Platform as a Service (PaaS)
- ❖ Private Cloud
- ❖ Public Cloud

# IM, CM, PM

The data centers process a tremendous amount of data in real-time and may be vulnerable to attacks. We at ACLIX have developed different approaches to Incident Management, Change Management and Problem Management based on ITIL practice.
